Manage Email account feature allows you Manage your company domain email addresses. Here you can add email accounts which are of limited space. You may use the feature by simply:

- » Log in in to your Tradekey account.
- » Go to Members Area.
- » Click "Trade Tools" at the top bar

When you are assigned with a company domain you are allotted with some space which you can divide into multiple email accounts specific to trailing domain which you have selected. You can Add account and you can also configure the setting of the domain to your outlook by clicking the Configure outlook.
